

Website Building: Basic Layout

CSS - Positioning

The following exercise contains the following subjects:

- ◆ Positioning

Instructions

We want to position the small box to the top of the bigger box like this:

Having the following html

```
<body>
  <div id="outer">
    <div id="inner"></div>
  </div>
</body>
```

and the following CSS:

```
#outer {  
width: 100px;  
height: 100px;  
background: darkcyan;  
margin: 50px;  
}  
#inner {  
width: 50px;  
height: 50px;  
background: lightgreen;  
position: absolute;  
top: 10px;  
}
```

We have set the inner div with position absolute and gave it a top of 10px, but it is not working.

Why?

1. explain in your own words what is the problem.
2. fix the code using the positions we've learned.

Submit the file to hive.
